TECHNICAL SKILLS

Languages: Python, Go, C#, Java, TypeScript SQL

Frameworks: FastAPI, Gin, .NET, Spring Boot, Node.js

Tools: Git, Linux, Docker, Kubernetes, Azure DevOps, SQL Server, PostgreSQL, Redis, Kafka, Prometheus, Grafana

EXPERIENCE

KPMG Ignition

Atlanta, GA

Software Engineer, Development - Tax Technology

April 2026 - Present

- Developed & deployed **10+ full-stack features** for Deal Connect **.NET** application on Digital Gateway tax platform
- Implemented role-based access system with granular permissions spanning **40+ APIs** and frontend **workflows**
- Delivered user-scoped bulk export feature **end-to-end**, generating on-demand Excel reports of **2,000+** deals at a time
- Engineered document upload & persistence feature, removing SharePoint dependency & reducing retrieval time by **33%**
- Automated client onboarding through **service-layer** and **database** enhancements, reducing onboarding time by **50%**
- Built self-service admin configuration tool, eliminating manual database updates across **10+** user/client settings

iHerb

Irvine, CA

Software Engineer Intern

Jun 2025 - Sep 2025

- Migrated legacy **.NET** services using Upgrade Assistant, resolving **25+** compatibility, **LINQ**, & async-related issues
- Diagnosed & fixed **20+** build / runtime failures via **CI/CD** logs, enabling successful **API** deployment to **Kubernetes**
- Validated **15+ endpoints** via **Swagger** & **Grafana**, verifying behavior in **3** envs (**local, pipeline, deployed**)

Universal Audio (Sponsored Project)

Scotts Valley, CA

Software Engineer Intern

Jan 2025 - Jun 2025

- Engineered **C++/JUICE desktop application** for a USB audio interface, implementing **13** real-time control features
- Implemented logic to translate user inputs into control messages, enabling communication across **4** audio channels

PROJECTS

Event-Driven Fraud Detection System | *Go, Gin, Redis, Kafka, Docker*

2026

- Designed **microservice** system (transaction/fraud-detection/alerting) with **event-driven async messaging**
- Built **Kafka** pipeline with **10** partitions, guaranteeing per-user transaction ordering via partition-key routing
- Implemented **stateful** fraud detection engine via **Redis** for recent transaction history, achieving **<200ms** checks

Financial Ledger Service | *Java, Spring Boot, PostgreSQL, Docker*

2026

- Engineered **double-entry ledger system** for recording transactions and ensuring **consistent** debit-credit balances
- Created **idempotent** payment **API** with **ACID** transactions, blocking duplicates across **1K+** concurrent requests

Transaction Reconciliation Service | *Python, FastAPI, PostgreSQL*

2026

- Designed **async** reconciliation **API** with **Postgres** audit trail, flagging discrepancies across internal & external records
- Built deterministic **matching engine** with fallback, detecting **99%** of data mismatches across **10K** test transactions

EDUCATION

Georgia Institute of Technology

Atlanta, GA

Master of Science in Computer Science - Artificial Intelligence

Expected Graduation: Dec 2028

University of California, Santa Cruz

Santa Cruz, CA

Bachelor of Science in Computer Science

Dec 2025
